WHY BIBO

- **Instant**

Hot and cold water at the touch of a button from the one machine. Replace your kettle and water dispenser with one BIBO

The BIBO produces 7 litres of chilled water and also produces 15 litres of hot water per hour. You can set the temperature range to suit your personal taste.

The BIBO is operated via a state of the art touch screen panel.

To dispense water, you simply choose whether you would like hot or cold water and your BIBO will dispense your choice.

You can also program the BIBO to fill your favorite mug, glass or sports bottle.

The BIBO can be programmed to dispense water at between 5-16°C for chilled water, 30-60°C for ambient and 70-98°C for hot water.

- **Clean clear fresh water**

The BIBO's multi-stage filtration system removes chlorine as well as any traces of pesticides, heavy metals and many other contaminants. On top of that, the UV filter lamp ensures the water is free from bacteria.

- **Save energy**

The BIBO is an energy efficient, CFC-free cold water system and a powerful hot water system that costs as little as 10-15c per day to run. It has two different energy-saving modes. You can set it to sleep after between 1 and 4 hours of non-use, or you can programme it to come on and go to sleep at the times of the day that suit you.

- **Water conservation**

Imagine how many litres of water you waste running the tap to get the water hot or cold. With BIBO you don't waste a single drop.

- **FREE 1 year BIBO warranty**

- **Free installation**

One of our qualified installers will deliver your BIBO, talk to you about where you want to position it and then install it. A typical installation takes 20-40 minutes. Your installer will then explain how your new BIBO works, run through your user manual and help you set any settings you want our help with. There will not be any mess. We take the utmost care of our customers' canteens and kitchens.

The BIBO is simply plumbed into your mains water supply. It automatically refills as you take water from it, so it's always ready to go, both for boiling & chilled water.

The BIBO measures 34.2cm high, 30cm wide and 35cm deep.

- **Rent or Buy**

You can choose to buy or lease your BIBO

For less than the price of one cup of coffee a day you can have your very own BIBO installed in your canteen or kitchen.

Try it - no obligation

We have such confidence in this fantastic product, we are happy to install it in your premises and let you use it for two weeks free of charge. If you like it at the end of the trial, you can buy or lease it from us.

If you don't want it we will take it out with no charge whatsoever.

If you would like a free trial, just call us today.
